The most popular fan game Smash on the Internet has received its biggest update yet - 3 years in the making! Are you ready to experience... SUPER SMASH FLASH 2 BETA? NOTE: This game is still very much a work in place. If you want to help with the development, please click here. ... Super Smash What? - Super Smash Flash is back! You remember us, don't you? The original Smash Bros fangame, the most popular in content and complexity rather than gameplay, Super Smash Flash was ... Well, Super Smash in flash. It showed very little resemblance to the actual Smash Bros gameplay as it was our first game, but still somehow attracted large crowds of people. Now, with the knowledge we have taken along the way, we are aiming for maximum quality this time. Super Smash Flash 2 is not a game made by one person in like SSF1. Super Super Flash 2 is a game made by hundreds of people over several years. This will be one of the biggest Smash Bros fan games - no, one of the biggest Flash games to date. Promise. Is it actually made in Flash? - This is true, and one of our main product goals here is to show that Flash is undervalued and undervalued. If we can make a quality game console with controller support, online mode, and 10 years worth of custom art, so you can. No other programming interface will allow us the kind of convenience and workflow that we have with Super Smash Flash 2 without custom tools. Flash is incredible for creating video games and animations with a low barrier to entry and an incredibly simple interface. Why does your game have a Wikipedia page? - I have no idea, but we are very happy about it. It's not in Twitch! Can I broadcast/watch the beta version of SSF2 live? Unfortunately, Twitch doesn't list us as a game. We suggest using YouTube Gaming! Do you have any differences? We have! Please note that invitations are not always open, so if the link doesn't work, please check again later. Can I use a controller? - If your OS recognizes it and you have drivers... Yes! Please note that currently only the downloadable version of the game (to your right) supports gamepads due to flaws and discrepancies in support between browsers. Where is the best place to find matches? - Our partners over at The Anther Ladder run an amazing chat with matchmaking built right in! Check it out here. Can you add insert symbol here? - Unfortunately, with a game of this magnitude, we have to plan things in advance so we can finish the game at some point. At this time, we are unable to accept offers of content for this reason. Excuse me! How can I support your development? - We do not accept any monetary compensation on behalf of Super Smash Flash 2. The best way to support us is to keep playing. It'll make us happy. Hopefully this will make you happy too. WHERE'S THE FULL VERSION?! - Super Smash Flash 2 beta release is our final full update of our public release to the full game. We work hard and do well on our way and we let you test our progress along the way - this is the point of the Super Smash Flash 2 demo. Is there a combo in Super Smash Flash 2? Absolutely. Super Smash Flash 2 has a low landing lag, high hitstun, and high gravity, leading to exhilarating combo games with plenty of confusion that will still feel at home to those from any of the official Smash games - even those where the combo doesn't exist. This is one of our main goals of the project. Which Smash game is based on SSF2? - I see you've noticed that SSF1 was based on Melee, yes. Well, think of SSF2 as Frankenstein. We break the Greatest Together type of deal with our engine, feel, and aesthetics, but we're also taking our own creative freedoms as well. There is no definite answer to this question! Well, in terms of terms The SSF2 engine is Frankenstein'd too. At first glance, it's very similar to Smash 4, actually, Some of the most obvious aspects of the engine will make it clear right away (with low landing lag, high-ish, high gravity, etc.) but it goes deeper than that and it will become more obvious as the game matures and we begin to activate our other aspects of the engine. Do the characters have complete moves? Absolutely. Some characters have an animation filler at the moment, but they will all be fixed before the full release. Does it work on Mac/Linux? - SSF2 works better on a Mac than on most Windows computers, actually! As for Linux, you can always play our game with Chrome until we get finished. Is there an online mode planned? It's in! © how about L-cancellation or (insert some sophisticated Smash Bros - associated acronym here)? Probably not included. As for L-cancellation, though, SSF2 has globally reduced landlag (some call it ALR - Air Lag Reduction), and instead of moving specific, it's mostly character specific with a few exceptions ranging from 3 to 12 frames (at 30 FPS). If we gave you L-cancellations, you probably wouldn't need to use it often. Super Smash Flash 2 is a 2D combat game that takes many of its elements from Nintendo's popular franchise, Super Smash Bros, and offers a very similar gaming experience with some unique features. For example, despite a very similar aesthetic (especially in all menus), Super Smash Flash 2 uses an 8-bit visual style that will make all retro players quite satisfied. The animation is pretty good, it's a real pleasure to see them moving in scenes. One of the most important parts of this type of game is the cast of characters you can play, and Super Smash Flash 2 won't disappoint you. Goku, Naruto, Sonic, Mario, Link, Pikachu, Kirby, Ichigo or Black Wizard from Final Fantasy are just some of the names you'll find. There are also a huge number of arenas where you can fight. There is not only one script for each character, but a few different scenarios that you will see are really fun. Everyone, of course, comes with some surprises. Controlling the game is just what you expect: two attack buttons that can be combined with any steering key to perform more than a dozen different attacks. The goal, as always: to throw enemies out of the arena after giving them a big one. Super Smash Flash 2 is a great fighting game that has the potential to provide fun for hours and it's just your beta!
