This site is not available in your country Good Housekeeping UK If, like us, you do not like doing washing dishes, investing in a dishwasher is worth the initial cost. These machines will not only save you time, but will also save you money in the long run. They use less water and energy when washing worth of whole meal plates and pans compared to when washing hands. And the results are also better, as our hands can not cope with the high temperatures necessary to kill bacteria. We tested 29 dishwashers from a range of brands, including high-end Mielees and more budget Beko models. These are our best performers: Full size vs. slimline vs. integrated dishwashers There are two questions you should ask yourself before investing in a dishwasher: how often are you going to use it, and how much space do you have? As a guide, both full-size and thin dishwashers are 55cm tall and about 55-60cm deep. However, full-size dishwashers are 60 cm wide and must fit about 120-150 items of utensils and cutlery, or 12 place settings (some machines with greater power can fit up to 15 spot settings). The slimline model is 45cm wide and will fit about eight to nine seat parameters. An integrated dishwasher is really a matter of aesthetics and convenience. With standalone models, the exterior and control panel are exposed. The integrated dishwasher will be fully installed in the kitchen block and have a door that matches your cabinets. The control panel is hidden on the upper lip of the door. Semi-integrated dishwashers have a visible control panel, but most of the door is covered with panels corresponding to those in the kitchen. Energy efficiencyAll machines are rated from AA to G, and the AA is the most economical. While the latest models with sensors are better than the old ones, the operating costs depend on how long it works, how often you work, and what the water temperature it uses. Intensive washes tend to work at a higher temperature, but should be used less frequently. By comparison, eco wash will work for a long time, but use significantly less water, i.e. less energy needed to heat it. Make sure to scrape the plates to get the most out of the dishwasher. The dishwasher settings explained Dishwashers usually have minimal settings, and they are usually easy to understand. All of them will have normal, environmental and intensive settings as standard. But all programs have a specific purpose, so it's worth knowing what everyone is doing; Normal: Best for daily use, this cycle removes standard dirt and food stains. This cycle will use 60-65C of water. Eco: This cycle is best suited for contaminated plates and cutlery. It will last longer but will use less water than a normal or intensive cycle. It usually uses 50-55C of water. Intensive: Best for baked food. The water temperature will be higher and it also gives the inside of the dishwasher a nice clean, too. Delicate: Best for glassware and delicate porcelain. The water temperature will be lower than Wash: It is best when you are in a hurry and the dishes are not too dirty. The temperature will be the same as in normal washing (60-65C). Hygiene: Best for items that need sterilisation, such as children's items or cutting boards. This program will wash at high temperature. Wash sensor: The dishwasher will have a built-in sensor to adjust the program's time, temperature and amount of water depending on how dry the dish is. Things to look for: Move the racks up or down to place large plates on the bottom rack, or high glasses on top. Automatic drying open doors: The door automatically opens at the end of the cycle to fresh air and humid air. Folding tines: Folding tines allow you to make more room for larger items. Salt and rinse relief indicators: They will let you know when the dishwasher salt and rinse aid needs topping. Smart features: Some dishwashers connect to Wi-Fi so you can control them through the app. You can start, stop or put a delay timer on the dishwasher remotely. On some high-end models, you can download additional programs, adjust the intensity and run diagnostics for the dishwasher. As we test we will evaluate each dishwasher on its performance at all settings and record how long the wash cycles are. We test whether buttons, settings, general design and instructions are intuitive and understandable. We're also testing whether the maximum number of seat settings can fit in the machine and run an intensive program using fewer seat settings. We paint an assortment of glassware, utensils, cutlery, pots and pans, using common and notoriously difficult to remove stains to see how each dishwasher copes. For consistency, we always use the same detergents and weigh each stain. We also record water and energy consumption. Advertising - Continue reading below 1 Best dishwasher Miele G7100SC Score: 93/100 The best of the three Miele models in our top 10, this mid-range standalone dishwasher has a large capacity that can fit almost 14 seat settings. We like that the door opens at the end of the cycle too, allowing moist air to escape and fresh air, meaning the elements can dry completely. On the test, he scored well in all areas. It's quiet, and it removed every stain, whether in a normal, environmental or intense setting. Although it's on the expensive side, it's a sturdy and reliable machine. Key SpecsEnergy Rating: AS Number of programs: 8Numer Seat Settings: 14Dishwasher Type: FreestandingDishwasher Size: Full-sizeNormal washing time: 2hr17minEco Washing time: 3hr50minIntensive Washing time: 2hr55min Read Review Miele G7100 SC 2 Best Budget Dishwasher Beko DFN 28R22B Score: 92/100 Like our winner, this Beko model has eight different programs including sensory washing that regulates cleaning depending on how dirty your dishes are, and a tray washed specifically for oven trays. It scored full scores on normal and eco washes, and we found that it did not consume too much electricity and water. We like a comfortable rack glass of wine, too. Common Common Is a sleek and modern machine that delivers good all-around performance. Key SpecsEnergy Rating: AS Number of programs: 8Numer Seat Settings: 14Dishwasher Type: FreestandingDishwasher Size: Full-sizeNormal washing time: 2hr25minEco Washing time: 3hr43minIntensive washing time: 2hr50 Read the full Beko DFN28R22 review 3 Best eco dishwasher Siemens SN25806TG Score: 92/100 Perfect for environmentally conscious, this Siemens dishwasher scored well for water and energy consumption in our tests. Like the aforementioned model, it has eight programs and can accommodate 14 settings. On the test, it is performed best on a normal setting, producing flawless and dry utensils. He couldn't remove the sweet baked food from the glass plate on the eco setting though. Overall, it is a great performer across and boasts impressive stain removal and drying abilities. Key SpecsEnergy Rating: AS Number of programs: 8Numer seat settings: 14Dishwasher Type: FreestandingDishwasher Size: Full-size Abnormal Washing Time: 2hr08minEco Washing Time: 3hr13minIntensive Washing Time: 3hr10min Read the full review of the Siemens SN25806TG 4 Best Cheap Miele Dishwasher Miele G4203SC Score: 91/100 This is the most affordable of the three Miele models in our top 10. It doesn't have some of the more advanced features found on high-end models, but it still works well. He scored full estimates for washing results on his normal, eco and intense washes, although he lost traces for low water and energy efficiency on normal and intense tests. Although we managed to put 14 sets of utensils in this dishwasher, the cutlery tray didn't have enough room for the final 3 spoons. Key SpecsEnergy Rating: ANumber Programs: 9Number Place Settings: 14Dishwasher Type: FreestandingDishwasher Size: SlimlineNormal Washing Time: 2hr53minEco Washing Time: 3hr52minIntensive Time Wash: 22hr48min Read the full review of the Miele G4203SC 5 Best Wi-Fi dishwasher Miele G7310SC Score: 90/100 This new, more expensive standalone Miele has all the features of our winning model, but also comes with some extra features. There's a Wi-Fi connection, so you can start the cycle remotely and hygiene settings to disinfect baby bottles and cutting boards. It doesn't have the automatic drying of the open house that the winner does, however. This model scored full marks on our routine, environmental and intensive tests - everything was clean and dry at the end of each cycle. His readings of water consumption and energy were poor when it was set for an intense cycle, though, and it was difficult to match all 14 seat settings in. Size: Full-size Abnormal washing time: 2hr29minEco Washing time: 3hr52minIntensEive washing time: 3hr01min Read the full review of the Miele G7310SC 6 Best integrated dishwasher Bosch Series 8 SMV68TD06G Score: 89/100 We like the kitchen that Bosch projects the time remaining to wash on the remaining semi. It also has an app that you can It's off-you can see the progress of your washing as well as how much energy it used too. It scored full marks for cleaning on both eco and intense conditions, but on normal wash some plates, bowls, and cutlery were not completely clean. It's worth noting that it has enough room for 14 seat settings, but the bottom basket can't always fit large plates. Key SpecsEnergy Rating: AS Number of programs: 8Mane Seat Settings: 14Dishwasher Type: Integrated SizeDishwasher: Full-sizeNormal Washing Time: 1hr17minEco Washing Time: 1hr01minIntensive Wash Time: 2hr20min Read Full Bosch SMV68TD06G Dishwasher review 7 Best slimline dishwasher Neff S596T60D0G Score: 89/100 There's a convenient chef mode on this Neff dishwasher that washes at 70C and claims to get rid of the stubborn, burned on the mud. The machine also projects the time left in the cycle onto the floor. This is at best when put on an economy cycle, scoring top marks for washing and drying, as well as for reading it water consumption. The normal cycle was equally good, but uses more energy. We also found that it doesn't quite fit into full power. Key SpecsEnergy Rating: AS Number of programs: 8Number Seat Settings: 10Dishwasher Type: Integrated SizeDishwasher: SlimlineNormal Washing Time: 1hr59minEco Washing Time: 3hr11minIntensive Wash Time: 12hr34min Read the full review of the Neff S596T60D0G 8 Best Integrated Slimline Dishwasher Medelstor Score: 88/100 Although this is one of the old Ikea dishwashers, the slimline model performs well to the test. It can fit nine seat settings and six programs all you need for everyday use. He performed best on the usual program, where he removed most of the stains and left the dishes dry. We noticed the cups on the top rack were not completely clean, though. The results on eco and intense conditions were less impressive, but the elements still came out clean. This model has low readings of water and electricity consumption, too. Key SpecsEnergy Rating: ANumber Programs: 6Number Place Settings: 9Dishwasher Type: IntegratedDishwasher Size: SlimlineNormal Washing Time: 2hr02minEco Washing Time: 3hr35minIntensive Washing Time: 2hr02min2hr22min Read the full review of Ikea Medelstor 9 Best for low water consumption Neff S15T80D1G Score: 88/100 One of the newest models of Neff, this dishwasher has eight programs and a convenient projector function, which shows the amount of time remaining on the cycle on the floor. It also has indoor light, which makes downloading a lot easier. It works well on the eco-cycle, removing almost all stains. Normal and intense washes weren't quite as good though as some items still had signs. We were impressed by its low water consumption, but the energy consumption was not so impressive. Key Rating: ANumber Programs: 8Number Place Settings: 14Dishwasher Type: Integrated SizeDishwasher: Full SizeNormal Wash Time: 1hr59minEco Washing Time: 3hr15minIntensive Washing Time: 2hr33min Read full Neff Neff Review 10 Best Effective Eco-Installation Whirlpool WFO 3P33 DL Score: 88/100 This Whirlpool model uses sensor technology to detect just how dirty the load is and adjusts its programs accordingly. We found that he did best on eco tuning, scoring top marks for his washing performance and low energy and water consumption. He struggled to clear some glasses on intense and normal washes though, and we struggled to match the bigger and higher cutlery in the top basket.
