If you're looking for how to unlock the secret hidden characters in HuniePop, you probably don't care about spoilers. However, if you're trying to avoid spoilers of this game, don't read past this item. While some of these spoilers will be found just by playing the game, others require some very secret sneaky power. Well, you've been warned. SPOILERS Kyu is a fabulous girl, your guide, the one who starts this little adventure - also the most obvious of secret girls. Unlocking it happens simply by succeeding in the game. Sext is a woman and she will let her intentions become known. Venus - Do these games have bosses? Well it's technically the boss of HuniePop. You may want to consider her boss Kyus or you know the Goddess of Love. To unlock it, sext all the original unclassified characters. Note, sexting hidden characters does not have a negative effect on you. Momo - why not be an obedient cat girl? To unlock Momo buy goldfish when they are available. Then all you have to do is throw them out of the inventory during the day. Once you leave this area Momo will appear looking for a host. Celeste - if you have a cat girl, you absolutely need an alien girl. Celeste is easily the hardest character to unlock. Once Kyu is unlocked, gift her dirty magazine you had on you from the beginning of the game. In return, she will give you a strange object. Now every day when it's evening, see if any of the women will be on the beach at night. It may take a few days, apparently the beach is not a popular nightlife. As soon as one arrives there, there is a strange object, and leave. Celeste will appear and be added to your index. Community content is available under CC-BY-SA unless otherwise stated. When they wake up, they experience a cosmic super period so powerful that they have destroyed entire galaxies, and can only be stopped by a hero who manages to satisfy his desires. This time, Kyus hopes you can do the job. All periods of PMS. Unfortunately for everyone, they experience a cosmic super version of this and are fully capable of a lot of destruction from it. Apocalypse How: Class X-3. They can destroy galaxies, and Ku's description suggests that this has happened more than once. Cosmic Essence: They have lived for at least ten thousand years, and by experiencing their periods they can destroy galaxies. Deus Sex Machina: Sexually satisfying them is the only way to get them back to sleep. No periods, period: prevented, and that's what makes Kyu look at the main character for help. The power of lust: The only thing that can stop them. Serious business: Their periods forced them to go on a space rampage. You have to get Laid: Otherwise their desires bring them to destruction. The game was released for Microsoft Windows, macOS and Linux personal computers in January 2015, after being funded by a successful Kickstarter campaign. HuniePop is available in two different versions, an uncensored version available through Humble Bundle and MangaGamer, and censored versions via Steam. The game follows the dating adventures of the main character as he or she tries to care for several different women in their hometown. In February 2015, released an update that gave HuniePop a new ending that opens up options that make it easier for players to fill out a female character profile and choose a date location, among other options. Due to strong sexual content and themes, Twitch has blocked users from streaming gameplay footage from the title, regardless of which version of the game was played. HuniePop gameplay showing date with May on the tennis court. The gameplay focuses on the player's character (who can be male or female), interacting with several different women, each of whom has their own personalities and preferences. The player can interact with women by talking to them and giving them gifts. This rewards the player with Hunie, an in-game currency that can be used to update a player's stats. This statistic allows the player to earn more points during the dates, increasing their chances of success. In order to progress through the game, players must take the women on dates, where they will play a tile matching game where they must make matches of 3 or more of the same tokens. The player must earn enough points to complete the date before they run out of moves. Each woman has a certain type of marker that they like and dislike, and players will get more points if they match the type of marker that a woman prefers. The player can also use special items called date gifts during their date, which give a positive effect to help the player earn more points. After a successful date, the player is rewarded with a photo of a woman with whom there was a date. Each successful date will also increase the difficulty of the game, making subsequent dates require more points to complete. After 3 successful dates with a woman, the player will be able to take them on a date night, and if that date is successful, the player can bring the woman into her bedroom for one final round of tile matching (and, if it is successful, have sex with her). Unlike regular dates, the player has unlimited moves to complete the bedroom game, but the score meter is constantly depleted over time, so to win, matches must be made quickly until the meter is full. Throughout the game, the player is guided by Kyu, a love fairy set to turn the player into a successful Lothario. It gives the player tips on how to interact with each woman and explains how different mechanics of the game work. It also becomes dated after a one-bedroom game. The Kickstarter development campaign was launched with a minimum funding goal of \$20,000. Kickstarter ended successfully, raising \$53,536 from 1,483 supporters. HuniePop's reception received a positive reception. Hardcore Geimer gave the game a top four out of five, writing: HuniePop is a pornography-dam thin pornography on this one, but it's also a shockingly good puzzle game. Sometimes these two identities feel at odds with each other, but for the most part they work in concert to show you a good time. Kotaku also gave a mostly positive review, praising him for being strategically deep and challenging enough to hit the accidental Candy Crush and also noted that there was no strong finish in the game. Mike Splechta of Game'one called the game fun and exciting. Destruid criticised At the end of the day, I realize that this is a game that, although riddled with problems, I really enjoyed it. Whole In fact, with the best writing and a few more care being given to the characters to flesh them out, it could be a lot more. Legacy Since the release of HuniePop, there have been other games inspired by him, such as Wing's Front's Purino Party. On April 4, 2016, Koons released a spin-off called HunieCam Studio. HunieCam Studio is an adult themed business simulation game, and features many characters that previously appeared in HuniePop. The artistic style of the game has also shifted into a more cartoonish style, from art to anime-based. Kotaku gave HunieCam Studio a mixed review, commenting that while the text of the game was sometimes entertaining, they found that the overall gaming experience would be extremely boring. The sequel, HuniePop 2: Double Date, is in production. This is a sequel to HuniePop with a player controlling the same main character, and will include returning characters from HuniePop and HunieCam Studio. Inquiries: - Bracke, David (March 18, 2015).
